

Recommended changes to MIL-STD-40051-6A™ 2 March 1999: Technical Manual
Supporting Information

Page 3, Introduction, The Army Maintenance System MAC:

Insert:

Unit – includes two subcolumns, C and O maintenance. Army Field

Direct Support – includes an F subcolumn. Army Field

General Support – included H subcolumn. Army Sustainment

Depot – includes a D subcolumn. Army Sustainment.

Page 5, Explanation of Columns in the MAC

Insert:

C – Operator or crew maintenance is Army Field maintenance

O – Unit maintenance is Army Field maintenance

F - Direct support maintenance is Army Field maintenance

L – Specialized repair activity (SRA) is Army Sustainment maintenance

H – General support maintenance is Army Sustainment maintenance

D – Depot maintenance is Army Sustainment maintenance

Note: All C, O, and F codes will be considered Field level maintenance tasks and all L, H, and D tasks will be considered Sustainment level maintenance tasks for Army ground systems.

Page 23, Table 1 MAC for TSEWC/ST-34:

Change all ground system MAC chart, column 4's to say Field above the Unit and Direct Support (C, O, F) column and Sustainment above the General Support and Depot (H, D) column.

See attached power point chart.
